

AUCOS-Systems

AUCOS-Coup for Eurogate Container Terminal Hamburg

Eurogate Container Terminal Hamburg has equipped part of their MTS fleet with automatic truck-trailer couplings "AUCOS-Coup". Waiting time for tractors and drivers is eliminated to operate safe and with a higher efficiency.

To handle MTS operation, AUCOS-Systems has developed the 3,5" kingpin for AUCOS-Coup. AUCOS-Coup has been running successfully at terminals in America for several years and is now operational at the first European container terminal.

AUCOS-Systems has three main products.

- AUCOS-Coup; automatic truck-trailer couplings
- AUCOS-Lock; fixed and retractable automatic twistlocks
- AUCOS-Leg; automatic landing legs
